

ALPHA LOW VOLTAGE SYSTEMS

COMMERCIAL LOW-VOLTAGE SYSTEMS ACROSS MISSOURI

Missouri-based response backed by experience supporting demanding, multi-site commercial programs. We help facilities plan, install, expand, and maintain the systems that keep people, property, and operations connected and protected.

CORE CAPABILITIES

1

Access control

Credentialed entry, door hardware coordination, system expansion, and lifecycle support.

2

Video surveillance

Commercial camera systems, recording, remote visibility, coverage planning, and upgrades.

3

Intrusion and security systems

Detection, monitoring-ready design, system integration, and operational handoff.

4

Fire alarm and life-safety systems

Code-conscious installation and service coordinated with applicable authorities.

5

Structured cabling, networking, and fiber

Copper and fiber pathways, terminations, testing, labeling, and clean documentation.

BUILT FOR COMMERCIAL WORK

Commercial and industrial

Retail, offices, warehouses, education, healthcare, property portfolios, and public facilities.

Missouri coverage

Mid-Missouri, Kansas City, St. Louis, Springfield, Northwest Missouri, and Southeast Missouri.

Scalable delivery

Single-site projects, multi-site rollouts, upgrades, troubleshooting, and ongoing system support.

Clear project controls

Site coordination, labeled work, testing, documentation, and practical closeout.

A PRACTICAL PROJECT PARTNER

From discovery and scope review through installation, testing, and turnover, Alpha Low Voltage Systems focuses on dependable field execution and clear communication. Our national-account experience informs the same disciplined approach for Missouri organizations that need a responsive local partner.
